In 1973 the space probe Pioneer 10 passed Jupiter and left the solar system for good, or so mankind thought...

3021 AD – An alien ship crashes to earth. Onboard, space pirates have hijacked the probe and sent the ship's computer into a self-destruct sequence powerful enough to blow up the planet!

Your task is to locate the computer and avoid total destruction. Missions include retrieving the energy crystal, swimming through hazardous fuel tanks in a hydronaut suit, and donning an exo-skeleton for the ultimate show-down.

"A fast and addictive shoot-'em-up, to keep you burning the midnight oil." CRASH 86%
